## MODULAR EXTENSIONS

### Modular Extensions for the 9500 & 1500 Series Grinders

Modular Extended Grinder applications include heavy-duty grinding, sanding, polishing with burrs, cone wheels, wire brushes, flap-type abrasives, and more. All models are designed and built for a long trouble-free operating life. A wide range of optional speeds, motors, lengths and terminations allows you to customize the tool to your particular needs.

### Extension Sub-Assemblies

Combining our extension sub-assemblies allows for a variety of configurations: Lengths available in 6", 12", 18", 24", 36" or 48" (1500 Series Only)

### Reach the Most Difficult Areas

Small diameter extended length front-end allows for two-handed operation in reaching difficult areas.

### Heavy-Duty Construction

Features heavy-duty "double-row" front bearings for maximum spindle support.

MP-1518EXT48DGS-C4

## MODULAR EXTENSIONS

### Less Operator Fatigue

Independent spindle and air motor design reduces vibrations.

### Built to Last

Hardened steel motor parts for extended tool life.

### Safety First

All tools feature two-step safety levers.
