

## Model MP-HCS-1000HD

### Hydraulic Air Operated Riveter

Michigan Pneumatic Tool introduces a new Hydraulic Air Operated Riveter. Uniquely designed, the **MP-HCS-1000HD** utilizes 2 pumps to deliver speed and power to any riveting application. The “speed” is delivered by a 500 PSI high volume pump and the rivet is crushed by the powerful 7000 PSI low volume high-pressure pump. The **MP-HCS-1000HD** pump is sold separately for many applications, or with “hand rivet gun” and yoke for riveting. Ideal for bus, truck, trailer, frame and aircraft riveting applications. The power unit can be ordered in trolley mount or wheeled for mobile applications. **Riveter and yoke not included.**

Michigan Pneumatic Tool model **MP-0505A** riveter delivers up to 14000 lbs. of force when used in conjunction with the **MP-HCS-1000HD**.

#### Pump Specifications:

Length .....	18-1/4"	Air Inlet Thread .....	3/8"
Width .....	12-1/4"	Weight .....	95 lbs.
Height .....	22-1/4"	Hydraulic Hose Thread .....	3/8"
Recommended Hose Size .....	3/8"	Pressure .....	7000 psi
