Help

Help for Searching

4 User Friendly Methods for Searching Our Site:

Item Code = Model Number or Part Number

Custom Code = Customer Specific Model Number or Customized Part Number

1. Product List (Java-Script Menu)

Our products are grouped into 9 categories: Abrasive Tools, Assembly / Fastening, Drills, Material Handling, Nibbling / Cutting, Percussive Tools, Riveting Equipment, Special Purpose, and Accessories / Parts.

These categories appear on the left of every page on the site.

Highlight a product category. A sub-menu will appear. Continue highlighting until the right-most option required can be chosen. Click on the final option that you require. **Note:** If a sub-menu appears in a category you require, you **must** choose an option in the sub-menu to display any item codes. Results are displayed in the middle of the screen.

2. Product List (Click-Thru Images)

Our products are grouped into 9 categories (images on the home page): Abrasive Tools, Assembly / Fastening, Drills, Material Handling, Nibbling / Cutting, Percussive Tools, Riveting Equipment, Special Purpose, and Accessories / Parts. Click the large images on the home page to view the product category click-thru links.

These images only appear on the home page.

When you select one of the product category images, that categories contents are displayed in the middle of the screen. This category click-thru continues until you reach the final level of a category, where a categories item codes will be displayed.

3. Product Search (Located at the top right of every page)

If you are unsure what category to choose, try our Product Search for a specific item. The Product Search allows you to search by item code or description. Select the item code or description button at the top right of the page. Enter the item code or description for the search. Click the GO button.

Michigan Pneumatic Tool has set up customized part numbers. You may also search by your customized part numbers. Select the custom code button. Enter your customized part number in the search box. Click the GO button.

Note: You **must** logon using your email address and password for this function to be activated.

4. Advanced Search (Located at the top right of every page)

If you are unsure what category to choose, try our Advanced Search. The Advanced Search allows you to specify your criteria using **multiple fields** at the same time. Decide which search criteria is important to you for each option, then click the Submit button. **Note: Do not** use the part number field unless you have previously set up customized part numbers with **Michigan Pneumatic Tool**.

You **must** logon using your email address and password to use the part number field feature.

Occasionally you may receive a search that returns **No Results**. Please make sure that you spelled the keywords correctly. Although every attempt is made to return the information requested, misspelled words or model numbers will not produce a match in our database (this includes dashes and spaces).

Michigan Pneumatic® Tool is the exclusive U.S. importer of **NPK®** tools.
